

(From left) Dr. Christopher Chweh, Dr. Julio Leon, Dr. Stephen Hensley, and Dr. Edward Wuch, associate professor of education at Southern, discuss the NCATE report at yesterday's press conference.

College passes NCATE review

Floyd Boschee, chairman of the National Council for the Accreditation of Teacher Education team, announced yesterday morning that Missouri Southern's teacher education program "met all 29 standards and it will be recommended that accreditation be granted for 10 years."

Boschee will make the recommendation to the office in Washington D.C. He said the advisory committee would then meet, and in most cases it will notify the institution that it is accredited.

He also said "the graduating class this year is covered."

The NCATE team that evaluated Southern was, according to Julio Leon, College President, "all new team members."

Persons making up the team included Boschee from Mandan, N.D.; Dr. Philip Benson, associate professor of teacher education at the University of Arkansas, Fayetteville, Ark.; Dr. Robert Dalke, professor of elementary education, College of the Ozarks, Clarksville, Ark.; Dr. Charles Ardolin, educational technology professor at McNeese State University, Lake Charles, La.; Dr. R.V. Wilson of

the State Department of Elementary and Secondary Education; Dr. Stephen Hensley, dean of academic affairs at Northwestern Oklahoma State University, Alva, Okla.; and Dr. Christopher Chweh, associate professor of education at Concordia College in River Forest, Ill.

Dr. Leon said, "We were impressed by their (the NCATE team) degree of professionalism. They adhered to the standards to see that the standards were met. We did not feel this happened last year."

He continued, "Now that the cloud hanging over our head has disappeared, it will help us return to the feeling that we're on the move."

In NCATE's report, Boschee said that out of 29 standards "nearly half of them had strengths."

He specifically commended the "strength in leadership in the dean of the educational unit, the College President, and long-range planning. The facilities are, of course superb. The faculty are very student-oriented, and

Group to ask for salary increases

Recommendations for increases in faculty salaries for night and summer school and a promotions policy recommendation will be presented Monday to Dr. Julio Leon, Missouri Southern president, by the Faculty Welfare Committee.

The committee will ask Leon for an increase in night school pay to \$500 per credit hour. Currently, Southern pays \$350 per credit hour for night school instruction.

Summer school salaries, according to the committee's second recommendation, should be based on a full load of six hours at 25 per cent of the base salary, and additional hours should be paid on a pro-rated basis.

A third proposal, concerning a promotions policy, is still under revision by the committee, according to Dr. James Volsky, Faculty Welfare Com-

mittee representative to the Faculty Senate.

"At least one more meeting will be necessary to work out the policy," Volsky said. "We had hopes of getting it to the Senate before the end of the semester, but it seems doubtful it will be ready by then."

Currently, the promotions policy proposal recommends that promotion be a scheduled event each year, and that a fixed calendar for applying for promotion be provided in the faculty handbook.

Ed Wuch, associate professor of education, presented the three original recommendations to the committee earlier this semester.

Concerning the promotions policy, Wuch said, "Faculty members should have the opportunity to apply for pro-

motion on an annual basis, instead of arbitrarily. Promotions should also be made regardless if the money is present to warrant corresponding pay increases."

"It's more an issue of pride than money," he added. "In many cases, recognition or acknowledgement of (a faculty member's) work is just as important as the money involved."

According to Dr. Joseph Shields, member of the committee, the committee based its recommendation for night school pay increases on inflation rates between years of substantial pay increases.

"The faculty has not received a substantial pay increase in at least five years," Shields said. "Two of those years, the country had 10 per cent inflation rates, and there were no in-

creases in pay."

Shields said the committee based its recommendation for a summer school pay increase to reflect a more proportional amount of the instructor's base salary.

"An instructor teaches 32 weeks in a full contract year," he said. "Summer school is eight weeks long, or one-fourth of the time, so the instructor should be paid one-fourth or 25 per cent of the base salary."

Dr. Paul Shipman, vice president for business affairs, said there is little consistency in calculating night and summer school pay in other state colleges and universities. Despite problems of calculating these figures, he said Southern's current salary and pay policies do compare with other state colleges and institutions.

Missouri Southern: Senate appropriates \$7.6 million

Missouri's Senate has appropriated \$7.6 million to Missouri Southern for next fiscal year.

According to Sen. Richard M. Baker (R-Charthage), "It is firm. That's what it will be, \$7,677,000."

Dr. Christopher S. Bond recommended that Southern receive \$6.8 million, and the Coordinating Board of Higher Education recommended \$7.6 million. Webster figured the college had appropriated around 92 per cent of the Coordinating Board's recommendation.

Baker said Bond "was using a light across-the-board increase."

Baker said the Senate and CBHE,

in figuring the increase in appropriations, worked together and recomputed the formula used.

According to Steve Daugherty, deputy commissioner for planning, "The main distinction is that this year we got away from the enrollment-driven formula and looked at the institution's plan and their expenditure base. We placed emphasis on the institution's needs."

Daugherty said Missouri Southern was at a disadvantage in the past because the College's "base expenditure has been rather low over the years." He gave "here-say" reasons as to why. For instance, administrators

may have spent money cautiously, but when the enrollment rapidly increased, funds could not be gained as needed.

"The way we calculated it before," Daugherty said, "it was hard for institutions to recover from historical trends. Missouri Southern will get a substantial increase and will have a very good competitive operating budget with other state institutions."

Said Webster, "The colleges that stayed with the cheap courses were ahead. Missouri Southern had more sophisticated-type courses which allowed for more money."

Faculty approves nursing program

Shaila Aery, commissioner of higher education in Missouri, has approved the Upper Division Bachelor's Completion Program for Missouri Southern, and will announce tomorrow's Coordinating Board of Higher Education meeting in West Plains, Mo.

The new degree program will begin next fall and will consist of supplemental education for registered nurses and students that have completed the associate degree nursing program, according to Dr. Betty Ipock, director of nursing.

"It's a model program thoughtfully designed to meet the needs of local nursing professionals," said Aery. "It's tremendous news," said Aery in reaction to hearing the ap-

proval. "Area nurses and hospitals are delighted," Ipock said. She added that the program was developed with area nurses' input.

"Due to rapid technological developments, the nursing role has become more demanding," said Ipock. "Many practicing nurses have realized the need to increase their education."

"An associate degree nurse is prepared to be a staff nurse in a hospital. In addition to that, a baccalaureate nurse is prepared to make independent decisions in a community health setting—away from the hospital."

According to Dr. Floyd Belk, vice president for academic affairs, some students are already enrolled in the new program.

"The program itself will not have a large number of students this first semester, but rather a very select group," Belk said. "We will probably have somewhere near 20 new students in that program."

Some changes will take place in the department because of the new program.

"We'll hire one additional instructor," Belk said. "There will be several of our current staff involved also."

New nursing courses will be offered, and Belk said there would also be one additional course in biology.

Planning for the program began about four years ago, and has "primarily been a project of the nursing staff," Belk said.

College organizes new policy handbook

An effort to combine several loose publications into one loose volume, administrators at Missouri Southern organized a policy handbook to incorporate both the faculty handbook, the student handbook, and other policies applying to the College.

Research and planning for the handbook began over three years ago, according to Dr. Floyd Belk, vice president for academic affairs.

"Three and a half years ago, the deans and department heads discussed various policies," he said. "The policies were then shown to the Faculty

Senate, and we then set about typing the manuscript by word processor."

Earlier in the semester, the new policy handbooks were completed and

Gov. Christopher S. Bond speaks at the Carver National Awards Banquet while State Rep. Robert Ellis Young listens.

Bond speaks at banquet

Gov. Christopher S. Bond hinted about seeking another political office in 1986 at a press conference prior to the George Washington Carver National Awards Banquet held last Thursday at Missouri Southern.

Bond, who was the guest speaker at the fourth annual awards banquet, said that he will wait before making any firm decisions about his career.

In his speech Bond cited Carver's commitment to education and economic development, and suggested ways that persons today can reaffirm that commitment.

"Today's complex society presents challenges to our educational institutions," Bond said. "We must prepare students for the future."

Bond said he has supported an increase in funding for both elementary and secondary education, as well as a statewide test to be administered before graduation.

One of Bond's most emphasized points was a bill that would aid children with learning disabilities. The

bill has passed the State Senate and is currently in the House.

"There are a number of children needing help with learning disabilities," Bond said. "This bill would give parents the opportunity to spot problems with testing, before their children start school."

Bond said many parents do not detect problems because they simply do not know what to look for.

"They give you more information when buying a new car," he said, "than on a new baby when you take it home from the hospital."

Bond has proposed, in addition to an increase in funding, measures that would ensure that students at all levels receive a quality education.

He used the Volunteers-In-Parks program, one of the recipients of recognition at the banquet, as an example of a method colleges could pursue to stimulate students' education.

Project features Latin literature

"The Greatness of Latin American Literature," a program featuring Dr. Roberto Gonzalez-Echevarria, professor of Spanish and comparative literature at Yale University, was held Monday in the Connor Ballroom of Missouri Southern's Billingsly Student Center.

A panel discussion, "The Contemporary Narrative Tradition in Latin America and the United States: Mutual Influences," was held after the lecture.

Gonzalez-Echevarria, the author of several books, is considered an expert in the field of Latin American literature. His presentation was entitled "A Hundred Years of Solitude: The Novel as Myth and Archive."

"A Hundred Years of Solitude" was written by Gabriel Garcia Marquez, who won the 1982 Nobel Prize for literature for the work. Marquez served as Gonzalez-Echevarria's main example of Latin American literature.

"Latin American literature is so compelling," Gonzalez-Echevarria said, "because of its relevance to world history." He then listed five areas in which to show its relevance.

The first area, he explained, is the works' "relation to the cosmos or universe."

"(Latin American literature) has the 'luxury' to return to myth to show a valid system of values, with no obligation to modern philosophies."

"It deals with society and social problems from 'degree zero,' or the origins of modernity."

The second area that makes the works compelling, he said, is that in the works "the past has not been abandoned."

"The emphasis is not on progress," he said, "but is instead a structure of myth that emphasizes high points and archetypes in history."

He referred to Latin American literature in general as "cultural fables of origins" that show a system of values that is valid for most Latin Americans.

Latin American writers' "intense perception of language" is another reason the works are compelling, he said. The authors' property—propriety crisis of language, or feelings of using a "borrowed" language, enhance this perception, he added.

A fourth reason the literature is compelling, according to Gonzalez-Echevarria, is the authors' perspective of the world. He said Latin American authors perceive reality as new and old simultaneously, and convey this perception through the use of "multiple perspectives" in their works.

Politics is the fifth area cited by Gonzalez-Echevarria of the works' relevance to world history.

He said Latin American works show "modernity in a culture that rejects modernity," and added that these authors view political change as a "cosmic beginning."

In the following discussion, questions were received by panel members Gonzalez-Echevarria, Henry Morgan, associate professor of English; Carmen Carney, associate professor of foreign languages; and Arthur Saltzman, assistant professor of English.

Carney directed the project, which was supported by grants from the Missouri Southern Foundation, the department of communications, and the Nina M. Carney Memorial Fund.

Dr. Roberto Gonzalez-Echevarria

Handbook

Continued from page 1

distributed to the faculty. "This was done sporadically," said. "They were distributed Faculty Senate first. Then copies sent to the deans and department heads, then copies were sent to the faculty. It was necessary for them in this sporadic manner of some of the changes that had been made."

Since that distribution, several faculty have given Belk feedback on new handbooks, mostly dealing with typographical errors.

"The president of the Faculty pointed out a problem with the charter," Belk said. "This was a question concerning the committee (Senate). There was a portion, but it will be added later. I also received a response from the Board of Trustees, but most of the response was dealing with typographical errors."

Due to the many changes, several pages had to be inserted into the handbook after distribution. However, Belk said the faculty seemed to be satisfied.

"Given the circumstances, I am satisfied," he said.

The policy handbook, Belk said, would be used for approximately four years. Since it is not bound in the form of a loose-leaf, minor changes can still be made in order to keep the handbook up to date. The content is what Belk said was the best advantage of the new book.

"[The greatest advantage] is bringing together of all the policies in one volume," he said.

Senate releases primary results

Results from yesterday's Senate presidential primary were announced at last night's final meeting. The two candidates in the row's general election will be Funderburk and Jean Campbell.

In other business, Dave Dyer, Senate treasurer, said that \$11,500 left in this year's budget.

With that figure in mind, the Senate approved \$492 to help student hygienists pay for a trip to the convention in Chicago. The Senate also granted a request of \$10,000 for machine technology studies used for tours to two Kansas City plants.

The Social Science Club was approved, after being earlier in the semester because there was no provision dealing with it. The constitution was amended to add a clause stating that there be no more than \$2 a semester.

Doug Carnahan, assistant to the president, told the senators that the installation of a telephone in the Joplin Student Center for student use had been approved. The phone will be in by this summer.

Bond

Continued from page 1

In addition to stressing education, Bond said that just as Carver's research helped develop 200 uses for the peanut, the midwestern United States must develop ways to stimulate its economy.

"As our economy shifts toward service-based and high-technology industries, we must pursue new avenues for economic development," Bond said. "To attract new jobs to Missouri, we must make a major investment in economic growth, now."

Bond said he has supported several measures to promote economic growth in Missouri. Among these are an increase in funding to strengthen economic development efforts and the creation of a Missouri Department of Economic Development to lead the state's efforts to create jobs and stimulate the economy.

Bond concluded by saying that all the students present at the banquet ensured that George Washington

Carver's legacy would continue to be a living legacy.

After the dinner, Bond was one of six recipients of a special commendation award. He was honored for his strong support and leadership which has contributed to the success of a variety of park programs.

Also honored by the National Park Service was Congressman Gene Taylor for his work to insure that critical needs for George Washington National Monument and Wilson's Creek National Battlefield were met.

Dr. Dell Reed, president of Crowder College, was recognized for the promotion of cooperative educational opportunities between Crowder College and the National Park Service.

Companies B, C, and D, 203rd Battalion, Missouri Army National Guard, received citations for the repair of storm damage at the monument.

Also recognized was Ray Balhorn, assistant professor of communications

at Southern, for his work to produce a film that provides a look at Carver's life. The film deals with his early years at Diamond, and portrays an aspect of his life not previously studied.

In addition to the six commendation awards presented, 36 Volunteers-In-Parks awards were presented to the students involved in the program. The students, from Southern and Crowder, prepared studies on various aspects of the park. Areas of student involvement included science, social science/history, photo-journalism, and environmental education.

Charles Odegaard, regional director of the Midwest Region of the National Park Service, concluded the evening's purpose by saying, "People usually think of glaciers and the Grand Canyon, when the National Park Service is mentioned, but the dedication of people, and their accomplishments, are the real natural resource we should remember."

Review

Continued from page 1

the alumni and the students on campus speak very highly of the campus."

Other areas marked as having strengths were: multi-cultural education, conditions for faculty development, counseling and advising for students in basic programs, materials, and the instructional media center.

Leon said NCATE's findings "simply validate this is a good institution."

Three areas were "met with weaknesses." These included the membership of the governing unit, the use of guidelines developed by National Learned Societies and Professional Associations, and the competence and utilization of the faculty.

Boschee said the areas of concern are where the institution is already working to correct those areas.

"And there are very few," he said.

Boschee also said Missouri Southern will have state, regional, and national accreditations.

Professor wins second at art exhibit

Dr. Nathaniel S. Cole, associate professor of art at Missouri Southern, has been awarded second place at the Second Annual Religious Art Exhibition at Trinity Lutheran Church in Mission, Kan.

Cole submitted an acrylic painting entitled "I Will Make You Fishers of Men." The painting will be on display through April for Easter celebration at Gallery 95, Overland Park, Kan.

"It was a little bit of a surprise to win," Cole said. "I didn't know where the art theme was in conjunction with

my subject, so I really didn't know how I would fare. It was a complete surprise to win. I think it is very fine, particularly since I haven't entered into any contests in quite awhile."

Cole said he used abstract, prismatic color planes to emphasize the mystical drama of the calling of Peter, Andrew, and James as Disciples.

There are several features in the exhibit, including the traditional content and style of religious art, and a wide range of contemporary styles and use of new media. Cole said the exhibit is to

encourage contemporary art to return to religious themes to spiritual ideals in modern society.

"There has been a revival of '60's to bring art back into churches," Cole said. "I like the types of paintings, particularly enjoy the subject matter."

There were 52 applicants in the exhibition. Over 150 entries were received. Cole said this exhibition was only two in the country which were sponsored by churches.

College to contribute funding to new project

Another example of College involvement in the community, Missouri Southern will cooperate with the city in research of artifacts in the mining and mineral museum located in Schifferdecker Park.

Missouri Southern Foundation is involved in the project, and will contribute funding. The Foundation donate \$5,000, the College's division of academic affairs will contribute \$5,000, and the city will match those contributions with \$10,000.

According to Dr. Floyd Belk, vice president for academic affairs and director of the project, the research will fill a gap that currently exists.

The city has an invaluable museum, artifacts collected over a period of 100 years," Belk said. "However, little has been written about those artifacts. It is necessary to do as much as possible in writing about them."

Several students at Southern will be involved in the project, which Belk

said may result in some type of publication.

"The first thing that must be done is the cataloging of the programs," Belk said. "We must then prepare a number of brochures that will tend to tell the story of various parts of the museum. If time and money is available, there should be some type of a major production that will tell the story of the museum."

Belk said the project would begin next fall, and research should take "about a year." Belk added that the city "is very excited" about the project.

It is not known who will be involved in the project, but Belk said many facilities on campus will be used in research, and students could benefit in several ways from the project.

"A greater share of the budget will be used for paying the students," Belk said. "It is valuable to the students educationally, and (financially) through scholarships."

Librarian to start June 1

Epstein will begin work as Missouri Southern's new catalog librarian in early June, according to Rodgers, head librarian.

Epstein will catalog material on the Library's On-Line Computer Center, (OCLC). According to Trout, circulation librarian, library staff is waiting for Epstein's arrival to begin cataloging material bought prior to 1980, or 85 percent of the library's holdings.

Epstein's appointment as catalog librarian is a post that has been vacant for a year, Rodgers said.

Trout said, "but much of it

requires a professional librarian."

The library staff has been without a catalog librarian since Elizabeth (Betty) Mueller's retirement last year.

Rodgers said reasons the library has waited to fill the position were primarily financial.

"We just didn't have the money," he said.

Currently, Epstein is working as the catalog librarian at Bethany College in Lindsborg, Kan.

Her qualifications include a bachelor's degree in history from Iowa University, and a master's of library science degree from Case Western University in Cleveland.

College appoints Dolence affirmative action officer

Dolence, director of academic development at Missouri Southern, has been appointed the College's affirmative action officer.

Tiede (dean of the school of business) has been acting unofficially in that capacity since President Darnton resigned," Dolence

said President Julio Leon appointed her late last semester about the position. She has been acting in that capacity since January.

The affirmative action officer position was part of a post created by President Darnton. A faculty member would be an assistant to the President,

part of those duties included acting as the affirmative action officer. Darnton, who was assistant to the President, had continued to act

unofficially after Darnton's resignation in 1982.

The duties of the office are to act as a monitor for the practices and pro-

cedures dealing with the hiring of new personnel," Dolence said.

She said that since this time of year is the peak season for hiring, it is her responsibility to see that federal regulations concerning the approach for hiring personnel are met.

"We try to keep pertinent updated material on the law on file," Dolence said. She said this might include information on advertising for and interviewing of potential employees.

"Basically speaking," Dolence said, "Missouri Southern is committed to affirmative action with or without federal regulations."

"With Dr. Leon as our leader, we would follow these practices," she continued, "regardless of the existence or non-existence of the guidelines."

Dolence said she felt these hiring procedures were important to guaranteeing the students at Southern a "cosmopolitan atmosphere" for education.

Fullerton photo

Debbie Schaller

Secretary of the Week Schaller much happier in relaxed atmosphere

By Elissa Manning

Always look for something good in every situation is a motto that Debbie Schaller has tried to uphold for 28 years.

Prior to starting her position as secretary in Southern's men's athletics office in July 1982, Schaller worked for two lawyers in Carthage. She said she is much happier in the relaxed atmosphere at Southern.

"At the law office it was a negative atmosphere with divorces and criminal cases," she said. "Here it's much more positive—a happy atmosphere where everyone is learning."

Schaller did find some good from her stay at the law offices.

"It was a good experience. I improved my typing skills," said Schaller.

Both Schaller and her husband, Gary, were raised in Higginsville, Mo. They were married July 13, 1974, the year she graduated from high school.

"I went to work right out of high school at an electrical co-op in Higginsville as a secretary/receptionist," said Schaller. "I worked there for four years during which I put my husband through three years of school at CMSU."

Schaller had also planned to attend college, but her plans were halted.

"I was going to go when my husband got finished, but I got pregnant. But I don't regret that. I wouldn't change anything I've done."

Rocky, her son, was born in July. He is five and will be starting kindergarten in Carthage this fall.

After Rocky was born, Schaller and her family moved to Hermann, a small German community 60 miles east of St. Louis. While in Hermann, Schaller worked in the junior high school and her husband taught high school art.

But, the Schallers weren't completely happy there.

"We had to drive to church and drive to get groceries; drive to do everything. We wanted a larger community," Schaller said. "Gary started looking for a job and I feel we were very blessed to get into Carthage."

Gary now teaches art at Carthage Junior High School.

"It's a big school system compared to what we've been used to. It's also a good school system."

Schaller and her family have been in Carthage for three years and plan on staying as long as their jobs will keep them.

"I love my job. It's the best one I've ever had," said Schaller.

Hours set for bookstore

According to Charles Moss, bookstore manager at Missouri Southern, the following hours will be available to return rental textbooks: Thursday, May 3, 6 a.m. to 8:30 p.m.; Thursday, May 4, 6 p.m. to 8:30 p.m.; Friday, May 11, 8 a.m. to 4 p.m.; Monday, May 14 through Wednesday, May 16, 8 a.m. to 4 p.m., and 6 p.m. to 8 p.m.; Thursday, May 17, 8 a.m. to 4 p.m.

After May 17, a \$2 late fee will be charged for textbooks returned after that date.

Chemistry majors receive awards at banquet

By Sue Puidk

Two Missouri Southern students were presented awards at The American Chemical Society's Annual Banquet held April 17 at Pittsburg State University.

William Joseph Bartlett, senior chemistry major, received the 16th Annual Eula Ratekin Scholarship Award for the outstanding chemistry student in the upper division.

The 1983-84 Freshman Chemistry Achievement Award was won by Randal J. Jolitz, a freshman chemistry major.

Bartlett, who majors in chemistry and minors in biology, was selected by Southern's chemistry faculty. He received similar awards in both his freshman and sophomore years.

He was "pleased that my efforts were recognized, and from a financial standpoint, it will help out."

Bartlett has a 4.0 grade-point average and is in his sixth semester

with "more than 110 hours because when I started out, I carried a double major in biology and chemistry. Initially, that was my goal." He had to change the biology major to a minor due to a lack of time.

"I really have to work," said Bartlett. "One thing that aggravates me is people assume it comes easy or think I'm a 'super brain.' I'm about burned out right now, and I'm not ashamed to admit it."

Bartlett believes "four points" contribute to a person making superior grades: A person must have native ability, work hard, develop rapport with all instructors, and attend all classes.

"I don't think I've ever missed a class for anything," he added.

Bartlett also works in Southern's library through the work study program, and spends his summers conducting research in the medicinal chemical department at the University of Kansas. This research is "involved with the

synthesis of amphetamine analogues to be used for pharmacological studies."

He hopes to do graduate study at KU, and is confident that Missouri Southern has provided a "good basis" for his future studies.

Six local companies contributed to the \$250 scholarship which is to be applied toward tuition fees: Bruce Williams Laboratories, Inc.; Chem-Staat Laboratories, Inc.; Eagle-Picher Industries, Inc. (Electronics Division); Farmers Chemical Company; W.R. Grace and Co. (Agricultural Chemicals Group); and Master Made Paints, Inc.

The Freshman Chemistry Achievement Award is given to the top chemistry student in the freshman class, and is made possible by the Chemical Rubber Company and its 65th edition of "CRC Handbook Of Chemistry And Physics."

Jolitz was "surprised" upon notification of the honor. He said, "I knew nothing about it and wasn't ready for

Elevator to run soon

After 10 months of construction and planning, the new elevator addition to the Fine Arts building will soon be in operation.

According to Dr. Paul Shipman, vice president for business affairs, there are still "a few bugs" to be worked out, but the elevator should be in operation within a week.

"We had a walk-through inspection over a week ago," Shipman said. "There are still some little details that have to be worked out. The controls are not working properly, so they are still working on it."

The new elevator has both a front and rear door, and provides access to four levels; music, ground floor, lower art level, and upper art level.

Total cost for the project, which also included the completion of a lobby, storage room, and replacing some sidewalks, was \$190,000, Shipman said. Construction was done by Dalton-Killinger Construction Co. of Joplin.

Shipman said the elevator was not the only aspect of the addition.

"This is not just an elevator project," he said, "but we wouldn't have done it without the elevator."

Shipman said the College's band uniforms can now be kept in a humidity controlled room, and now there is a lobby that can be used for art displays or as a lounge.

"We still have to decide what the lobby will be used for," he said. "It may be used for a lounge between classes, but I would imagine the art people may want to use it as a display. There would be a problem with security with an art display there, however."

The elevator section was not included in the original building plans for several reasons, mainly because of building design.

"The two buildings were constructed in two phases, and they were not designed to accommodate an elevator," Shipman said. "It is unfortunate the elevator wasn't planned originally. Now, the elevator serves the needs for both the Fine Arts and the Music buildings. I feel really good that we have finally finished the elevator for the handicapped students."

Society initiates new members

Sigma Tau Delta, Missouri Southern's nationally-affiliated English Honors Society, recently initiated 11 new members during an induction ceremony.

David Ashmore, Jeanne Elick, Pat Hensley, Sue Puidk, Arlene Boman, Carolyn Fagan, Anne Dawson, Arlisa Moody, Darla Little, Ella Ross, and Nancy Alexander were initiated in a ceremony conducted by student officers Kim Horner and Mark Rogers.

College President Julio Leon; Dr. Floyd Belk, vice president for academic affairs; Dr. Joe Lambert, head of the English department; and Dr. Ann Marlowe, faculty sponsor, were present at the ceremony.

OPINION

College should name 4 buildings

Missouri Southern's policy handbook states that the buildings used by students should be assigned distinguished names, rather than have simple designations. Why is it then that three major structures on campus are, as of yet, unnamed?

Those 'John Doe' structures include the technology building, the business building, and the women's residence hall. The alumni house, while not used primarily by students, is also unnamed.

It would seem appropriate then that College officials should take this opportunity to honor specific persons for their actions which have benefitted this college.

Of the lengthy list of names to be considered, a few seem to stand out.

Elvin Ummel is the only original member of the Board of Trustees and the Board of Regents not to have a building designated after him. His name seems a likely one to be on the building now simply titled Technology.

Why not Ummel Technology Building?

It should be pointed out that no building on campus bears the name of a woman. South Hall has remained nameless, while North Hall has become Richard M. Webster Hall.

Edna Drummond, who taught science for 18 years at Joplin Junior College, Missouri Southern's forerunner, and served as its first dean of women, is worthy of the honor of naming a structure after her.

Why not Edna Drummond Hall instead of South Hall?

The Wallower family, the original owners of the Mission Hills Farm, which is where Missouri Southern is located, should be honored by the College. Their house now serves as the business administration building. The house could bear the name of its original tenants.

Why not Wallower Business Administration Building?

Julie Hughes retired from Missouri Southern in 1982 after 19 years of College service as a history instructor and director of the alumni association. Why not the Julie Hughes Alumni House?

These are just a few of the people who should be honored by the College. Several more names could be used on the five residence halls, known now as only A, B, C, D, and E.

It would also seem appropriate that the rooms in the Billingsly Student Center, rather than be named for mining operations, be re-named to pay tribute to specific faculty members.

People, who by their service to the College, have demonstrated their concern for the academic pursuits of this educational facility should be accrued this honor. There could be a Lucille Dinges Room, a Francisco Colon Room, and a Delbert Johnson Room to pay tribute to three specific faculty members, now deceased.

By naming and re-naming these structures the College could begin to express its debt of gratitude to these educators who played such an important role in the formation of Missouri Southern State College.

Editor's column:

Sexual abuse surfacing in day-care centers

By Barbara Fullerton
Director of Photography

In today's world, the single parent and a high percentage of both parents in the family are employed. Their children are taken into the arms of the "protected" care of day-care centers in all cities of the United States. Late-ly, "protected" is not the word. A new word is "brutalized."

Earlier this month, seven persons faced charges of sodomy and rape. These persons ran a day-care center in Manhattan Beach, Cal. The center was headed by 76-year-old Virginia McMartin. There were over 100 pre-school children staying at the center. By frightening the children into silence, their crimes were not discovered until last September. The center was closed in two months. Authorities believed that the child abuse began 10 years ago. On April 6, the seven persons were arraigned on 115 counts of criminal charges for sexually molesting the children.

Cases of sexual abuse were publicized as ear-

ly as 1981, when California police found more than 4,000 slides of nude nursery-school children at a day-care center. Then there was the case of Lori Nathan, who is serving a term in prison for murdering a little boy and battering a dozen children in a center near Oakland, Cal. This month, at a day-care center in Lynwood, Cal., a handyman was arrested for molesting children.

In Idaho, an operator of a center was jailed for abusing girls. In Greer, S.C., Donna's Day Care Center was closed after six children reported they were molested. At another preschool, investigators are looking into the alleged abuse of a two-year-old child. And, in an earlier trial, the former director of a boy's club pled guilty to 46 counts of molestation.

As the parents work, thousands of day-care centers have been established, and many of these are unsupervised and uncontrolled. USA Today said the reported cases of sexually abused children have soared across the United States, leaving the youngsters with deep emotional and physical scars. These children are

found with psychological problems, venereal disease. Researchers estimate one out of four girls and one out of eight under the age of 18 are victims of sexual abuse.

Last year the budget for the Department of Protection for Children was cut. Without funds, it cannot protect the children. Legislatures are considering laws to regulate day-care centers. Texas and Iowa are on proposals to license the centers, and laws are being established in New Hampshire and Colorado. These centers need strict and must have licenses and annual inspections. Parents must check the reputation and screen the centers carefully.

People are awakening to this nightmare, and they know something must be done to protect their children. It is a long account in which parents need to be involved. Adults are here to protect children. Children need to live a happy "fairy tale" life. There needs to be a great concern to take care of our children because day's children are the world's future.

In Perspective:

Leadership program is valuable to all students

By Elaine Freeman
Director, Freshman Orientation

Another academic year is winding rapidly to a conclusion. However, in early May a special group of students will be involved in kicking off the second annual Leadership Training Program at Missouri Southern. Thirty-five leaders from across the campus will be entering the planning stages for a program that culminates in the welcome and orientation of students entering college for the very first time—a program fraught with responsibility, recognition, reward and HARD WORK.

This past fall, 37 very enthusiastic students combined efforts to lead one of the most successful orientation programs in the school's history. On a broader scale, their work has been acclaimed at state, regional, and national

student personnel meetings as a highly unique and creative approach to meeting the needs of incoming students.

The student leaders spend two days in a late summer workshop and then the rush is on. A freshman orientation class outline must be prepared, lectures planned and then, for most, it is the first hour in the classroom on the instructor's side of the desk. In addition, weekly leadership class meetings are required.

But, lest it sound like there is all work and no play, the leaders report a real sense of enjoyment from the first icebreakers and the "esprit de corps" developed in the workshop through the new associations developed in the classroom.

The leadership program has served in several ways. Assistance for the new student is obviously a central focus but the personal benefit

for the leader in gaining valuable skills in applying them in the laboratory setting is an important. Retaining students is a high priority and a positive orientation can be assessed as vital from the college standpoint.

Who becomes involved in the student leadership program at Southern? Basically, the one that describes our leaders best, both past and present, is commitment. The original leaders are students who are already carrying a heavy load, already involved in campus activities, already involved with home and family, already working part-time to pay college expenses. Time management is a way of life so is an infectious joy in living. They are involved because of who they are and because they want to give back a portion of what Southern has given to them. They are special. They are Southern. They are special.

SPECIAL

Olympics only a portion of program

Some 900 children participated in the Area 5 Special Olympics held in Fred G. Hughes Stadium on April 6.

"This was the 15th year that Area 5 had a meet", said Mary Heger, area coordinator for the Special Olympics.

The national Special Olympics program started in 1968. According to Heger "the Missouri Special Olympics started about 20 years ago."

She explained that the Special Olympics is only part of a year round program for these kids.

"We have bowling meets, we send kids to state competition (in the special Olympics)" Heger said. "We had a fine arts festival at the Spiva Art center also in January."

Within Area 5 there are seven counties: Jasper, Barton, Berry, Lawrence, Dade, McDonald, and Newton. Kids from special

schools are eligible to compete in the olympics.

The six events of the olympics are supported by fund raisers, Heger said. She also explained that the education department provided support in areas such as janitorial service.

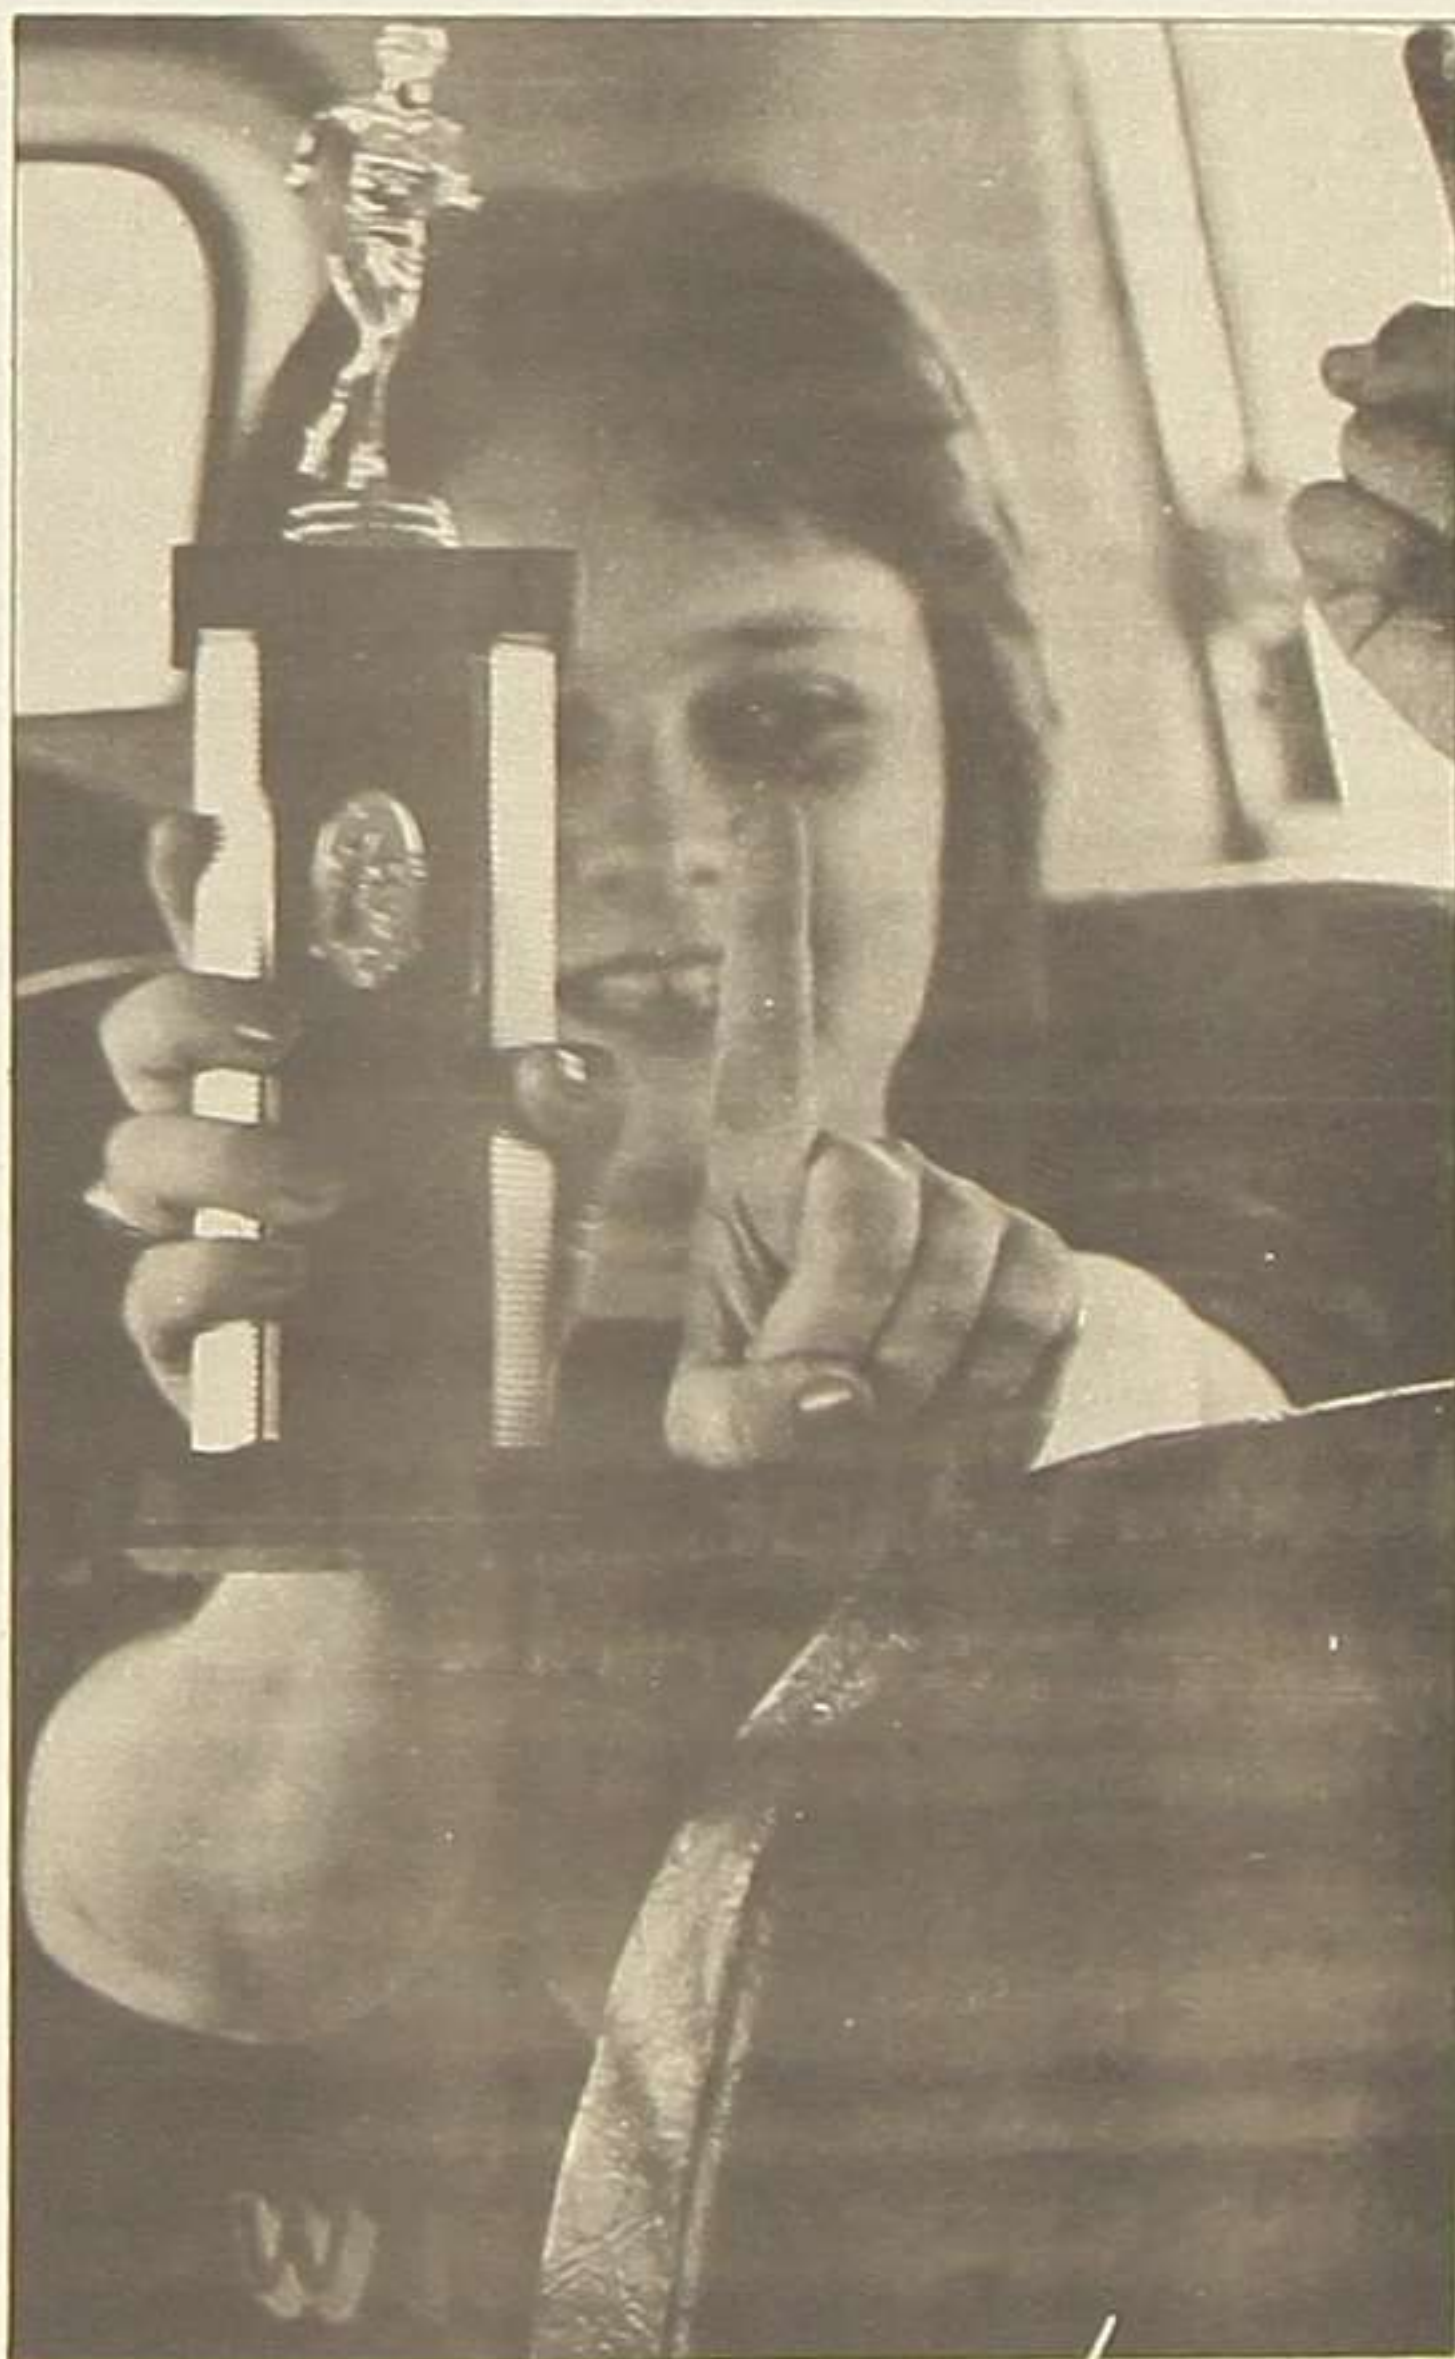

Heger's job encompasses arranging all the events and the fund raisers that support the games. In the past, some fund raisers have been a pancake feed, a coke walk-in, a letter campaign, an auction, and a rummage sale.

She explained that the pancake feed brought in \$1,000 "pure profit. Fleming Foods Co. had donated all the food."

Of the children that competed in the games at Southern 200 will go to state competition in Ft. Leonard Wood, Mo., Heger said.

She said that the games are expected to be held in Hughes Stadium again next year.

Counterclockwise from top) Ready for the 25 meter footrace, Odie Lee awaits the whistle of Michael Banks, associate professor of education. Bill Kohler and Randy King finish first and second respectively in the category of the 50 meter dash. Participant receives a congratulatory from friend and coach. "Everyone's winner" and Nita Ray is no exception as she displays her trophy before the bus ride home.

Musical groups plan two concerts

Two performances are scheduled by Missouri Southern's Collegiates and Concert Chorale for their annual Spring Concert May 3 and 4.

The presentation on Thursday, May 3, will be at 8 p.m. in Phinney Recital Hall. A repeat performance will follow at 8 p.m. Friday, May 4, at the First Community Church.

Featured by the Collegiates will be several choreographed selections, including "Celebration," "In My Room," "California Girls," and "Fun, Fun, Fun."

Other medleys to be presented include the country tunes "Cotton Fields," "Thank God I'm a Country Boy," and "Grandma's Feather Bed." Melissa Manchester's "Come in From the Rain," and "Over the Rainbow" will provide a contrasting mood for the medleys.

Rounding out the Collegiates' part of the program will be two folk songs by composer Johannes Brahms and the Italian madrigal "Matona, Lovely Maiden" by Orlando di Lasso.

A mixture of sacred and secular works will be presented by the Concert Chorale. The stirring "With a Voice of Singing" by Kenneth Jennings will begin their part of the program. They will continue with the moving Russian anthem "Tu es Petrus (You are Peter)" by Alexander Gretchaninov.

A pair of contrasting selections will

include the spiritual "Did You Hear When Jesus Rose?" and "Prayer" from the *Well-Tempered Clavier* by J.S. Bach.

The rarely-heard chorus "A Lonely Boat Drifts Slowly" by Robert Schumann will also be presented. This selection will be accompanied by flute and French horn.

Vachel Lindsay's poem "The Mouse That Gnawed the Oak-Tree Down" will be heard in "A Fable" by the contemporary composer Norman Dello Joio.

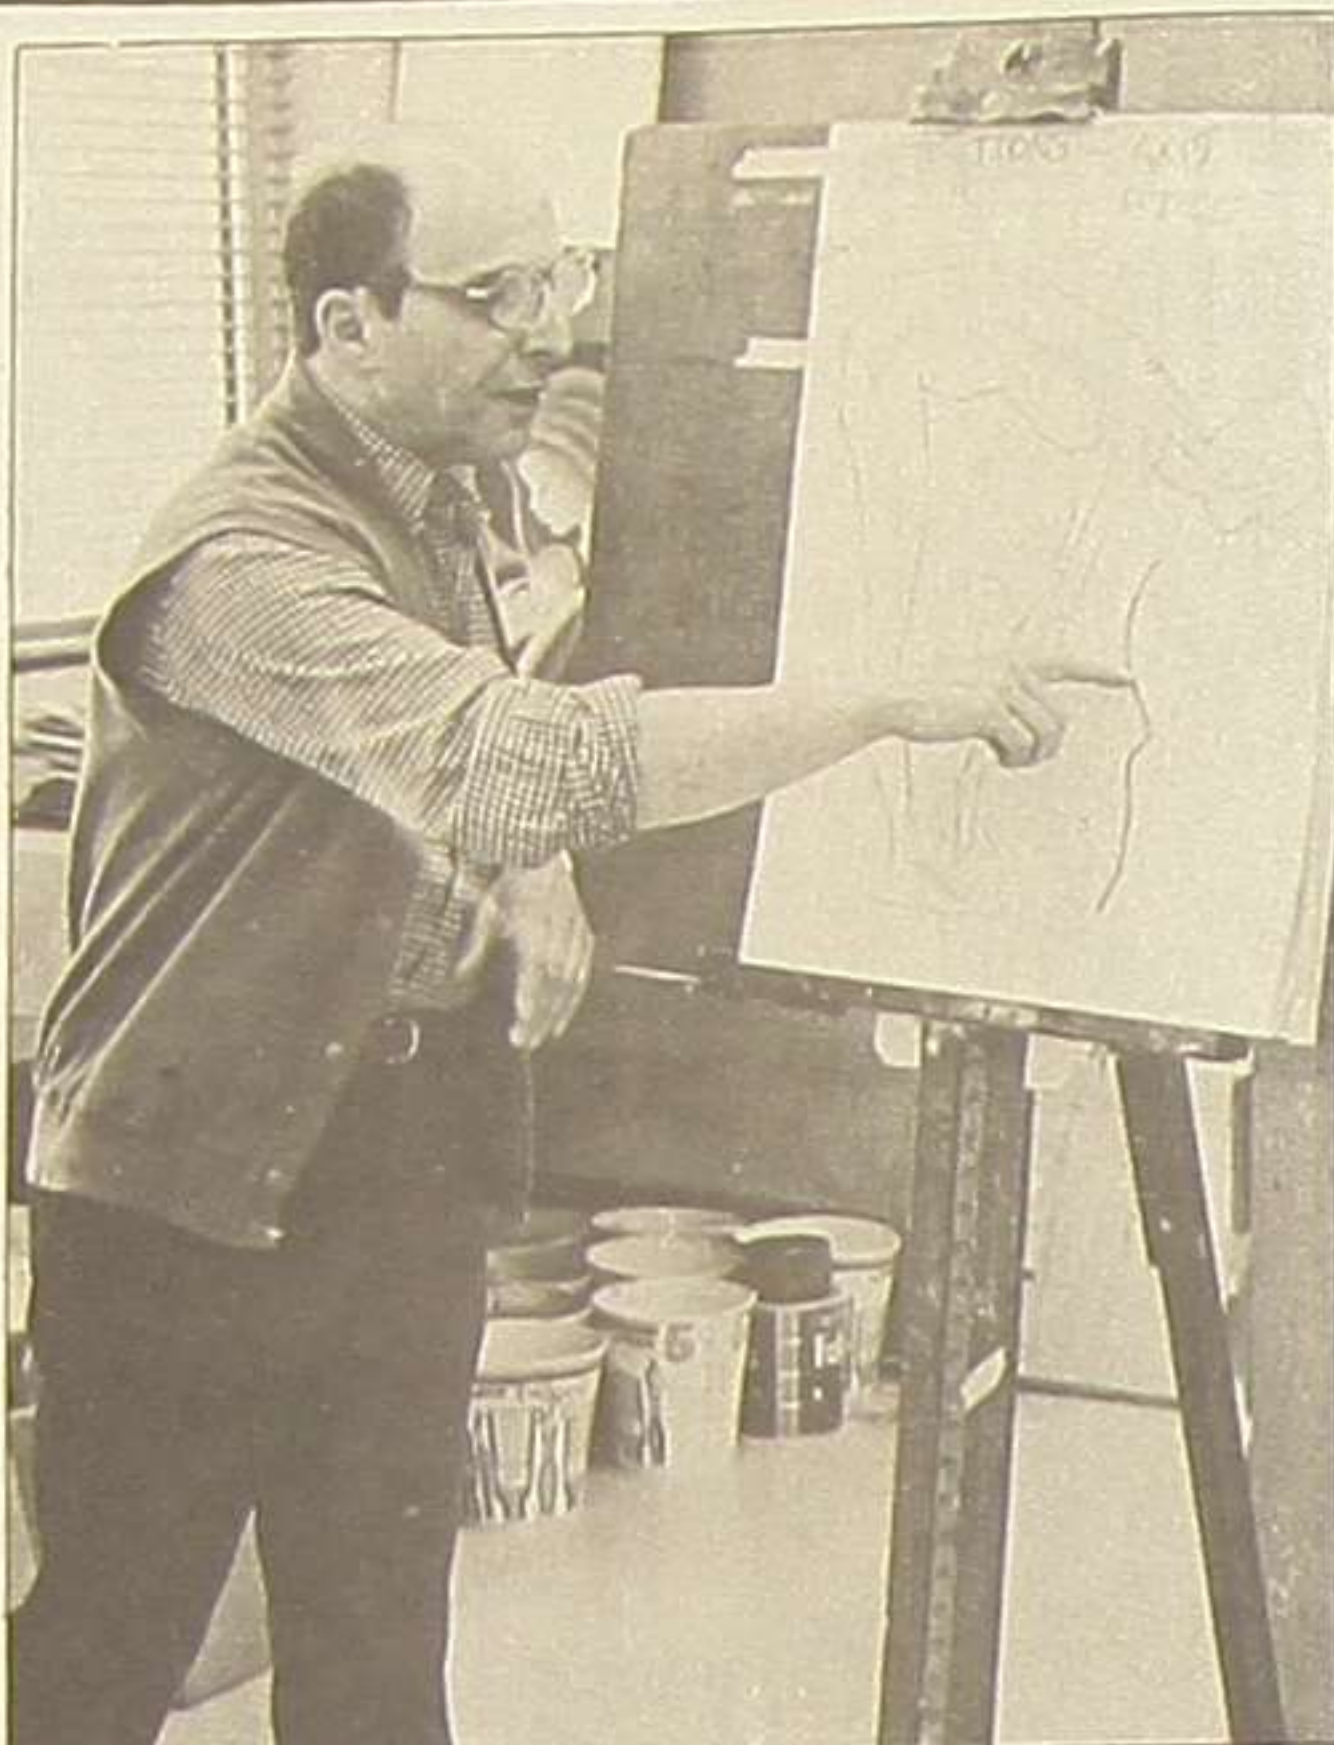

The moodful "Evening in Transylvania" by Bela Bartok, the American folk song "The Cowboy's Lament" and the novelty song "Little Bird, Little Bird" by Gail Kubik are scheduled for performance.

A Mother Goose rhyme "The House That Jack Built" by Huston Bright will provide a treat for the children in attendance.

The following 60's and 70's hits featured in the two medleys "For Women Only," and "For Men Only" will include: "One Fine Day," "My Guy," "You've Lost That Lovin' Feeling" and "Three Times a Lady."

The final number will be the traditional "Precious Lord, Take My Hand."

Dr. Al Carnine, assistant professor of music, will direct the concert. The performance is open to the public free of charge.

Fulerton photos

Artist Nathan Goldstein was on campus last week as part of the Fine Arts Festival festivities.

Concert band plays tonight

Several programs are presented this week by Missouri Southern's Concert Band.

The annual Spring Concert is scheduled at 8 p.m. today in the Performing Arts Center.

The program, under the direction of Pete Havelly, will open with "March" by Dostal and "The Louvre Selections" from "The Louvre Joio" will include "The Children's Gallery" and "The March," "Intermezzo," "Finale" from Jacob's Suite will be presented. Wayne Harrell will conduct pieces.

The program will continue with "Valdres" by Haukszen and "Yugoslav Dance," "Spear's Fallen is Babylon," and "Lloyd Webber: A Symphonic Portrait," arranged by Nowak. Bagley's "National Emblem" will close the program.

The concert is open to the public free of charge.

The band was on tour in Missouri earlier this week. On Monday it traveled to Lamar. It presented a concert in Lebanon on Tuesday evening and an afternoon program in Richland. Wednesday morning it presented a concert in Camden.

Coffin to speak May 3 as part of lecture series

Dr. William Sloane Coffin, Jr., an internationally-acclaimed Methodist minister and public speaker, will present a lecture entitled "The Arms Race and the Human Race" at 8 p.m. Thursday, May 3, at the First United Methodist Church, 5th and Pine Streets in Pittsburg, Kan.

Dr. Coffin's presentation will be the Second Annual Dr. Lloyd H. Rising Theological Lecture. The lecture is free to the public with no reserved seating, according to the Rev. Gary A. Schrag, First United Methodist pastor.

Coffin is the senior minister of the Riverside Church in New York City. He has often been the television guest of William F. Buckley, and has presented lectures all over the world.

Coffin was involved in the military during World War II, and received a bachelor's degree in government at Yale University in 1949. Coffin then worked for the Central Intelligence Agency. During the Korean War, Coffin worked for the CIA in Germany training anti-Soviet Russians for operations within the Soviet Union.

He received a bachelor of divinity degree from Yale Divinity School. He has served as chaplain for Phillips

Academy, Williams College, and Yale University. He was appointed by Sargeant Shriver as one of the initial advisors to the Peace Corps and organized and became the first director of the Peace Corps Field Training Center in Puerto Rico.

Since becoming the senior minister of the Riverside Church, Coffin has continued his peace advocacy work. On Christmas Eve 1979, Coffin was one of the three United States clergymen invited by the Iranian government to hold Christmas services for the American hostages held in Iran.

Coffin has written for several newspapers, and has completed several books, including *Once To Every Man*, an autobiography; *The Courage of Love*; and *Civil Disobedience: An Aid or Hindrance to Justice?*, a series of debates published by the American Enterprise Institution in 1972.

"Dr. Coffin will help meet one of the goals of the lecture series," said Rev. Schrag. "That is to bring to the Pittsburg area persons who reflect views not often voiced here. He is controversial, partially because of what he says, but more by the sharp way he says it. He will be exciting to hear."

Soprano Tandee Prigmore will present her senior recital at 3 p.m. Sunday in Phinney Recital Hall.

Prigmore and Dr. Joe Sims, her vocal instructor, have been preparing for her recital since last summer.

Many hours of practice have gone into the preparation of the selections Prigmore has chosen to perform for her recital. Besides singing "Pieta, Signore! (O Lord Have Mercy)" by Stradella (1645-1682), "The Lord is My Light—Psalm 27" by Allitsen (1849-1912), and "Sea Moods" by Tyson, which she has previously performed, she has selected seven new songs to perform.

These are "Sheep May Safely Graze" by J. S. Bach, "Air: He Shall Feed His Flock Like a Shepherd" from "Messiah" by Handel, "Für Music (For

Music)" by Franz, "Still Wie Die Nacht" by Carl Bohm, "Aus Mein Gossen Schmerzen (Out of My Soul's Great Sadness)" by Franz, "Solo Cantat No. 199 (My Heart is Deep Distressed)" by Bach and "Grandma's Prayer" by Hageman."

Prigmore said, "The reason for my choosing these pieces is I want to magnify the Lord. I realize my voice is a gift from Him, so I want to use it to serve Him through these songs."

Accompanying Prigmore on the piano is Mike Moyer. "Mike played for me when I was a junior in high school attending music contests, and when I found out he was enrolled in the music department here at Southern I knew I wanted him to accompany me for my college recitals," she said.

Monett students wins scholarship

Graduating high school seniors within a 100-mile radius of Joplin recently had the opportunity to compete for the Thomas Hart Benton Scholarship.

This year's winner of the \$500 per year scholarship was Bekki Turner of Monett High School. The scholarship is renewable for four consecutive years upon recommendation.

Other winners included Brad Mc-

Clintock and Doug Grisham of Webb City, and Shiela Myers of Broken Arrow, Okla.

Entries for the competition were accepted from April 7-14 in the Missouri Southern art department. Judging took place April 16-20. Jurors for this competition were faculty members of Southern's art department.

"We looked for a variety of subject matter, technical skills, media, ability,

and overall presentation," said Fowler, head of the art department who participated in the judging. "Judging was difficult due to the excellence of submitted work, and final vote was extremely close."

In the supportive category, it was requested that eight entries be submitted, but due to the number of tries, two artists were allowed to submit nine pieces.

Shakespeare group to meet

Next meeting of the theatre department's Shakespeare Seminar is scheduled for 3:30 p.m. Monday in the Taylor Performing Arts Center.

The purpose of the seminar is to help familiarize interested persons with Shakespeare's plays, language, and the entire Elizabethan culture.

Monday's topic will be a continuation of last Monday's discussion "Midsummer Night's Dream." Trij Brietzke, sponsor of the seminar, suggested that anyone who could bring a copy of the play should bring it to Monday's meeting.

Also featured during Monday's

seminar will be four students who attended a Shakespeare workshop at American College Theatre Festival in St. Louis earlier this semester.

"They will share with our group some of what they gained at the workshop," Brietzke said.

This will be the last meeting of the seminar this semester, but "it is very possible that these informal sessions will continue through the summer," said Brietzke.

"We would like any interested person on campus to join us, and interested in participating in the summer sessions should contact the theatre department," she said.

WE'LL PAY YOU TO GET INTO SHAPE THIS SUMMER.

If you have at least two years of college left, you can spend six weeks at our Army ROTC Basic Camp this summer and earn approximately \$600.

And if you qualify, you can enter the ROTC 2-Year Program this fall and receive up to \$1,000 a year.

But the big payoff happens on graduation day. That's when you receive an officer's commission.

So get your body in shape (not to mention your bank account).

Enroll in Army ROTC. For more information, contact your Professor of Military Science.

Joe Wood and Wilbur Kendrick, carpenters at Missouri Southern, study a woodworking project.

Kendrick to travel after retirement

By Joan Zabasnik

Having a good time, meeting new people, and traveling are three main interests that Wilbur Kendrick plans to explore further after retirement.

Kendrick, a carpenter at Missouri Southern, said, "I like people and the work because it doesn't get old. It is the same thing, but different."

After attending South Junior High and working for the N.Y.A., he left for California.

Upon returning, Kendrick entered the army in 1943. He served as a Private First Class on the anti-aircraft and field artillery units until 1945 when he received his discharge. While in the service, Kendrick received five battle stars and a good conduct ribbon.

"I wish it had been under different circumstances," Kendrick said of his travels while in the Army. He saw Scotland, England, France, Germany and Belgium.

After his discharge, Kendrick and

his wife returned to California and made their home in the Santa Maria area. There they raised their eight children. Four of the children still live in Santa Maria, while two are here, one in Oklahoma, and the other in Kansas.

"I spent most of my time in Santa Maria. Then the people from Los Angeles began to move in, and it got too big," said Kendrick.

In 1971, Kendrick and his wife moved back to Joplin, and he worked at Morgan Roofing Company. In 1974, he came to Southern.

"I like it real well, but when I reach 62, I am going to quit," Kendrick said. His duties include the repairing of windows and doors, plus building new partitions and cabinets.

"I am looking forward to traveling. My wife likes traveling too," said Kendrick. Kendrick wants to see more of Arkansas and all the southern states.

"We've never had much, but we've always been happy and that's what counts. When I retired I just want to travel as much as I can."

Hammer uses own 'code of ethics' in duties

Landoll

ated to serve the human race, give society and to establish good relationships with is how Richard Hammer puts into perspective.

er, senior vice president of affairs at St. John's Regional Center, uses his own code of duties in his everyday

ay harder, get along with and to learn more every day is test challenge and to relieve stration that one could an from such a position," Ham-

id that his responsibilities are, as a liaison from hospital ad- and medical staff repre- to insurance and law firms. I between from a lawsuit back hospital. I am responsible for recruitment, any legal and

regulatory areas, and I am responsible for the hospital to meet all requirements for licensing.

Hammer came from a poor family that lived in Neosho.

"I worked as a janitor in the eighth grade to help my family," he said. "My dad and mother both received just sixth grade education. My father was a carpenter. We got out first indoor plumbing when I was 19. I thought the world was at our feet."

After graduating from Neosho High in 1940, Hammer joined the service.

"I joined the Navy because I wanted to learn, Hammer said. "Though we were poor, my parents wanted their children to be educated. Since we had no money and the Navy's free, I enlisted. There I was certain to learn a skill. I became a certified radiologic technician."

After being discharged from the Navy for failing his eye exams, Hammer decided to join the Army.

"At first I didn't get accepted. When I got married I was reclassified. On my honeymoon, I was drafted," he said.

When completing time for the Army in Denver, Colo., Hammer and his wife moved back to the area to work at St. John's Regional Medical Center.

"I started working in the old St. John's as an orderly and radiology technician in 1948," Hammer said. "Through correspondence and on-the-job training, I received my registered radiation technologists degree. In 1950, I promoted to Director of Radiology which I served as for many years."

Hammer said he then decided to get a college degree.

"I had yet to really graduate from a four year college," said Hammer. "I got accepted into the 'University Without Walls' at Stephen's College in Columbia. I received credit for previous college hours. I took the College Credit program and tested out of

more college courses. I guess I realized my career would be put to a halt or standstill. I didn't want that. After completing summer and independent courses, I finally received my Bachelor of Arts from Stephen's."

He continued, "I then went to PSU in 1978 to start my Master of Science in Psychology. I attended night school and again took advantage of correspondence courses. During this time, I was promoted to the position I now hold."

In regard to his future, Hammer said, "I plan on retiring in the next couple of years. I want to practice in psychology counseling. I need to get away from the 6 a.m. to midnight routine, daily and sometimes weekends, to have a career based upon my own time."

Hammer says he is extremely proud of his family.

"Norma, my wife of 42 years, still has the qualities that I married her for

at 20 that she beholds now," he said. "She has given me four children during our marriage. I am very proud of each of them."

Hammer, 63, anticipates leaving his position somewhere in 1986.

"I plan to work with psychology and find time to bass fish in Telequah, Okla., and in Shoal Creek," he said. "I enjoy running, when the weather is nice, and most sports."

Hammer said of the new patient tower at St. John's, "I am not afraid to fail. I can do it. We can do it. The people that are afraid to try, never fail. The people that are afraid of failure, are the people that never try."

Hammer compared his feelings about leaving his position to his children growing up and leaving home.

"One must make adjustments. When you are mature to make adjustments, you must prepare yourself to move on with life."

Lester Martin, custodian, enjoys other things besides his job, including writing songs and working with electronics.

Custodian finds music, electronics interesting

By JoAnn K. Freeborn

Full-time custodian, part-time musician, and would-be entrepreneur—Lester Martin is all of these and more.

Martin, a graduate of Diamond High School, had worked at several jobs before joining the custodial staff at Missouri Southern eight years ago. His area of responsibility is the Mills Anderson Police Academy.

"I really enjoy my job, but it really makes me wonder what people's homes are like sometimes," Martin said.

One of the main problems he faces in his job is scheduling major maintenance work because of the heavy use of the facility. According to Martin, there is something going on nearly every day and night of the week.

A self-taught musician, Martin plays the bass guitar. Until recently he was associated with the Oklahoma Brew Band. He said he prefers country or easy listening music. However, whether playing in a local club or at a

picnic for several hundred persons, "pleasing the crowd is always the main objective," Martin said.

Martin said he enjoys listening to his extensive collection of records and tapes, and is a songwriter in his own right. Though none of his songs have been published, he has about 30 to his credit.

Electronics is another interest of Martin's. As a sideline, he hopes someday to start his own small business.

"I am experimenting with a method of making printed circuit boards using a photographic process to insure exact duplication," he said.

A confirmed bachelor, Martin said, "I guess I just like my peace and quiet."

His parents live on a farm near Diamond, and Martin said he dreams of returning there to build his own underground home.

"I've always done a lot of research on alternate energy," said Martin. "And I would like to build a house that is totally self-sufficient."

Career change brings Caldemeyer into secretarial field

By JoAnn K. Freeborn

In 1966 Ethel Caldemeyer, wanting to make a career change before time ran out, left a factory job to begin a secretarial career.

After spending her childhood in Indiana, Caldemeyer married and moved with her husband Bob to Texas and then to Joplin.

During those early years of her marriage Caldemeyer said she enjoyed staying home and devoting herself to raising her two daughters, Janet and Linda.

"When they were both in school I decided, for financial reasons, to go to work," said Caldemeyer.

She took a job at Pacific Mercury as a cable assembler and worked there for the next 10 years.

Then, in 1966, she began to consider a career change. A friend called to tell her of a secretarial opening in the registrar's office at Joplin Junior College.

"I had worked as a secretary before my marriage and I had always wanted to get back to that type of work," said Caldemeyer. "Besides, my daughters were not real pleased about my work at Pacific Mercury involving the 'building of weapons of destruction.' I was also concerned that I had to work near so many questionable chemicals. So, in spite of having to take a drastic pay cut, I decided to make the change."

During her secretarial career, Caldemeyer worked for Margaret Mitchell, Dr. Paul Shipman, Dr. Floyd

Belk, and Dr. Glenn Dolence.

"I enjoyed all my years at the college," said Caldemeyer, "but I suppose the time I enjoyed the most was the time I worked in student services. There, I worked more closely with the students."

Her responsibilities included the normal range of secretarial duties. However, each supervisor had his own methods and requirements.

"One of the most interesting things I worked on each year was the annual scholarship banquet," said Caldemeyer. "I think it served somewhat the same purpose as the current Phon-A-Thon and was always a big event."

Caldemeyer said watching the college grow in stature through the years

has been a special experience and an important part of her life.

"It is such a wonderful place," said Caldemeyer. "Students receive such personal attention. I sometimes think that they are not fully aware of just how fortunate they are."

In 1981, Caldemeyer reached 62 and could receive Social Security benefits. Her husband had retired earlier, and she wanted to spend more time with him and their grandchildren. She decided it was time for her to retire.

One of the many memories she carries with her is of evenings spent enjoying plays in the old Barn Theater.

"It had such a special charm," said Caldemeyer, "and I miss the students and the excitement of college life. It really keeps a person young."

Snyder recalls years as director of center

By Emily Sanders

"I leave the center satisfied that we have done as well as we could with what we had to work with and the time we have had to do it in."

Ross Snyder, associate professor of education, is retiring in June after 16 years as director of the Educational Media Center. He came to Southern in 1968 from Taylor University in Upland, Ind.

"I have seen this place develop from an embryo to its present state," Snyder said. "When I came here we had one bookcase with textbooks and some old records someone had donated. Now we cover this whole floor. I'm very proud of our accomplishments."

"This whole floor" includes nearly 32,000 items of equipment, prepared software, and curriculum printed media. Media items include reading improvement machines, televisions, a listening center with 4,000 audio tapes, records, manipulative materials, maps, charts, globes, filmstrips, slides, video

tapes, multi-media kits, transparencies, test sets, and four computers.

Besides equipment the Media Center provides services such as year-round circulation, workshops, resource and orientation advice.

Snyder said, "The programs of the media are for all the staff and College. This is no small order. The problem is not in developing but keeping ahead and being innovative. The concept of the Media Center is that we are no longer in the library book age, but in the technological age. We have to start thinking in terms of instant retrieval and retention. With the advent of the computer—it's a whole new ball of wax."

He went on to say, "The College has not always been completely oriented to develop a media center. [Former President Leon] Billingsly was. The problems have been with the budget. There are always problems of that factor. We have four computers. We should have more. They are in use constantly. We need money for commercially prepared programs. But you take

first things first and work from there.

"I've been very proud to be a part of the education department here. The concept was to keep it intact, separate from the library, yet related to the library as closely as possible. In order for it to work it has to be available for the preparation of teachers...I think too often the importance of the education department is overlooked on campus. We have provided a lot of excellent teachers."

He believes service is an important aspect of the media center. He said, "The services to the community would surprise some people—to know just how much we serve teachers, churches, individuals, and industries."

Dr. Edward S. Phinney was the dean of academic affairs at Taylor University, and when he became the vice president for academic affairs at Missouri Southern, he was instrumental in bringing Snyder to Southern. Snyder said, "Primarily to develop the media center."

Snyder said, "I've been extremely fortunate to have good personnel—the

secretary and Mr. [Don] Mosely. So much of the credit for the development of the center goes to them. We're fortunate and have excellent student workers too—they're peaches. They over-extended themselves as to what they have to do."

Snyder is "excited and challenged" by retirement. He said "I believe it's the little things that happen that change your life completely, not the big things that you plan on. I'm waiting for a little thing to come along and make me a new and different person."

Snyder describes himself as gregarious. He said, "Everything is my hobby. I love gardening, bicycling, to read, to watch TV, to travel, and eat." When he retires, Snyder plans to travel to Eureka Springs and Texas, and visit his children and a new grandson in Indiana. He wants to spend more time with his daughter in Joplin. He also plans to do some writing. He said "I'm interested in researching psychic phenomena. If the Russians are interested in it, we ought to become

more concerned to find out anything to it."

Snyder hopes his replacement "someone competent. Someone I'm interested as I have been."

He said, "There are some things that need attention. We have a budget for prepared programs. There are many new items we need. Replacement of equipment is going on. I would like to see a developed here. It would be a micro-teaching were brought to this area. I would like to see interest and concern on the part of those who supply us with budget. (the media center) would remain an integral part of education and not swallowed up into the library. The director would not be responsible to both the head librarian and of the school of education psychology. That makes it difficult. It should all be under the direction."

Press to publish Saltzman's book

Every writer dreams of having his work published by a prestigious publishing company. Dr. Arthur Saltzman, assistant professor of English at Missouri Southern, had his dream come true when his book, *The Consolidation of Language in the Fiction of William Gass*, was accepted for publication by the Southern Illinois University Press.

Saltzman's book pertains to William Gass, a St. Louis writer who is emerg-

ing as a major contemporary writer. Saltzman said the book would be part of a series entitled "Crosscurrents."

The author spent over a year preparing the manuscript for publication. He said "Crosscurrents" was a series the publishing company also began work on about a year ago.

Saltzman has written many works in the past, and has had various articles published in other magazines and books.

When he received word from the publisher, Saltzman said it "certainly made the afternoon go much smoother."

"Their main reviewer is an eminent critic in the field, and I'm glad to be recognized by persons of that caliber," Saltzman said.

Saltzman said he plans to "sharpen up" the manuscript and text throughout the summer. He will receive royalties from the publication on a percentage basis.

12 art students receive demonstration

Integration of Missouri Southern's art and technology departments took place last week when 12 students in the Introduction to Design in Art class of Garry Hess were shown a demonstration of the new computer-aided drafting system.

Ron Morgan, assistant professor of drafting and design, explained the features of the new system while Brent Beckley, freshman drafting major, operated the keyboard and digitizer pad to draw a house floor plan and geometric shapes—pentagon circle, rectangle, arc, line, ellipse, and bezier

curve.

Morgan called the new system a "speed-up tool" especially helpful for repetitive work. Morgan also pointed out the features of a stepping motor, lettering, and automatic centering, which takes the place of using a template or compass.

Both fields use the same types and patterns of design to achieve different purposes. Hess wanted his students to see the differences in variations. He said, "We're more concerned with the visual image we get immediately." He would like to see art students take the

beginning design and drafting class.

Both Hess and Morgan said an "interlock" takes place between the two fields in the area of commercial art. Hess would like a minor in commercial art to be offered. Morgan said, "We could reinforce each other."

Morgan invited the students to try using the system. One called it "neat," and one student who did not try it said, "I'll stick with my pencil."

Said Morgan, "It becomes easy after you've experienced it for awhile."

Representatives plan interviews

Representatives of the Missouri Department of Revenue will be at Missouri Southern on Tuesday, May 29, to interview accounting graduates or graduates will 12 hours of accounting, for possible jobs in the Joplin-Springfield area.

To be eligible for the interview the student or alumni must be a December, 1983, or May, 1984 graduate and must have credentials on file with the placement office.

Interviews will be conducted in the Placement Office, Room 207, in the Billingsly Student Center.

Are YOU interested in ADVERTISING?

You can gain practical experience in the advertising field and sales promotion right here on campus.

THE CHART is looking for a Business Manager for the Fall, 1984 semester. This is a paying position and deals with the operations of the "business world."

For more information contact David Bunch or A. John Baker

in **THE CHART** office, Hearnes Hall, room 117, or call 624-8100, extension 228.

South Hall is Lane's home

By Julie Landoll

To many students, South Hall is simply a place away from home, but to Evelyn Lane, South Hall is home.

Employed five years by Missouri Southern, Lane is matron of South Hall, the women's dormitory. Lane describes her duties as "to clean these halls and rooms as if they were my own."

Lane became employed at Southern in the fall of 1979 when her daughter Melaine was a freshman at Southern commuting from Neosho.

"We lived in Neosho then and she would have to drive from there everyday—so I decided...I would also," said Lane.

"I'm happy with my job and myself," she said. "I find peace and enjoyment in my everyday routine. I leave here daily with new ideas to take home to my family. Most people never experience this kind of contentment."

Lane, the mother of three, still has two sons living at home with her in Joplin. Her daughter has transferred to the University of Missouri-Kansas

City to complete her degree. Her sons, one a car restorer, the other a partner in their own Ozark Sheet Metal, are two of the most important people in her life.

"Most mothers have only one child around the house," said Lane. "I'm divorced for two years, I feel fortunate to have two men in my life."

Born in Galena, Kan., Lane is the daughter of a construction worker. Moving from town to town during her teens, her family finally settled in Aurora, Ill., where she met her husband. After being married at 20, she moved back to the Joplin area where she worked in the old N. Department Store on Main Street.

"Women had to work back then to raise a family just like they do now. Most men were in the military," said Lane, "which included a band."

Lane goes through her life to fulfill her philosophy "to be a friend." To the hall women, she has been shining in that department.

Teverow receives grant for study

Dr. Paul Teverow, history instructor at Missouri Southern, has received a grant from the National Endowment for the Humanities to participate in a summer institute on the topic of the introductory history course and the new history.

The institute, sponsored by the Community College Humanities Association, will be held from June 3 to June 29 at the University of Colorado

in Boulder. History faculty from two-year colleges will study the methodology of the new history, including curriculum materials will enable them to improve their introductory history course. The institute, participants will develop specific curriculum projects and introductory history courses offered in their own institutions.

HANG IN THERE!

When you finish this Outward Bound course, you're liable to be a different person.

Outward Bound is more than a trip of high adventure. It's discovering yourself. Learning that you're better than you think you are. And finding out how to work with others. Come join us on a wilderness trip of excitement and self-challenge. You may come back a better you.

Hang in there! Send for more information:

Railroad club growing rapidly

Students or faculty interested in railroads or model railroading are invited to join a new club recently organized in Joplin.

According to Marty Oetting, a student at Missouri Southern and spokesman for the Southwest Missouri Railroad Association, the club was just formed this year.

"I organized the club in January, and it is growing rapidly since its inception," Oetting said. "It is open for anyone of any age who is interested either in the prototype or in model railroading, or both."

The club meets at 7 p.m. every other Monday night at Windfall Light

Stained Glass Shop, 512 Joplin Street.

There are several activities the club is involved in, including a club layout, operation on various layouts in Joplin, prototype photography trips, films, and other items of interest.

"Currently, our major thrust is with the club modular layout," said Oetting. "A modular layout is one in which each member in a club builds a small section compatible to all other sections so they can be assembled into one large layout."

Once the modules are completed, Oetting said they may be displayed in public, and will be the center activity for the club.

"We hope to have it completed for display at the Northpark Mall in November for National Model Railroading Month," Oetting said.

"Once it is completed, the club will operate on it every weekend. It is a project that will involve many members of the club. There will be engineers, dispatchers, switchmen, and main controlboard operators."

Oetting said many aspects will go into the club layout project, including woodworking, electronics, computer programming, and group communication.

"With a little practice, I hope we can put on a realistic, smooth show for the

public," he said. "There are many interesting displays on the layout that should be enjoyable for the public, especially kids."

Oetting said there are many benefits of such a club.

"The major benefit is that members are able to make new friends of all ages," he said. "It's nice to see young students discussing something they are interested in with retired men, each helping the other in any way they can."

For information on the club, persons should call Oetting at 781-4483, or 624-8100, Ext. 228.

Nurses Association honors Joplin woman

Miss Manning

In connection with National Nurse May 6, District 5 of the Missouri Nurses Association has honored Nurse of the Year to Ophelia

The actual reason for National Day is to heighten awareness of contributions of registered nurses," said Marilyn Jacobs, president of the District 5 Nurses organization and an assistant professor of nursing at Missouri Southern.

The lady has been an outstanding nurse in nursing, and is a tremendous example of professionalism," Jacobs

Braeckel, a native of Joplin, graduated in 1925 from St. John's School of Nursing in St. Louis. She worked in the field of private duty, and was being hired by the family to provide patient for continual care throughout the illness.

It was before the days of intensive care, cardiac care, and recovery," Braeckel said. "The hours were from 7 a.m. to 7 p.m., or 7 p.m. to 7 a.m. depending on the case and varied from a few days to weeks or months, including Sundays and holidays."

Braeckel served for four years in St. Louis being called home to aid an ill relative. After 11 years of caring for a relative, she returned to private duty in Joplin.

Twenty-four-hour duty was still common at the time in Joplin. You had a cot that was pushed under the bed during the day," said Braeckel. "My patient was desperately ill, layed around the clock. If his condition warranted it, you went from 1 to 5 p.m. to catch up on

needed sleep, laundry, chores, or whatever."

At this time Braeckel served as the secretary/treasurer of District 5 of the Missouri Nurses Association. She advocated a change in the workday from 24 to 12 hours. To this, she and her supporters faced strong opposition.

"I was president of 5th District, and a patient in Freeman Hospital, when the crucial, deciding meeting took place," said Braeckel. "A jubilant group came to my bedside to inform me that 12-hour duty had been voted in."

In 1944, Braeckel joined the Army Nurse Corps and served two years in England, France, and Germany during World War II.

"We had the same unbelievably rugged modes of life. Some were inspiring experiences," she said.

When she returned to Joplin, private duty nurses were working eight-hour shifts, but that field was becoming less important.

She served at both St. John's and Freeman Hospitals in a variety of departments. Braeckel even started working in a new field; she served as a surgical nurse for 23 years.

Since her retirement in 1969 Braeckel has stayed busy visiting sick friends and relatives, and doing church work.

"I have been faithful to my patients and have enjoyed my work," she said. "I feel grateful that nursing happened to me."

Braeckel said she feels satisfied with her life. "I feel like when God asks me 'What have you done with this life I've given you?', I think I can give him a pretty good report."

School of Business to offer data processing in summer

Missouri Southern's school of business administration has announced the addition of a three-hour course in managerial data processing for the summer semester.

Classes will meet from 7 a.m. to 8:15 p.m. Monday through Thursday, beginning June 5 and continuing through July 31.

Managerial data processing is designed to introduce the business person to basic management skills but computer experience to managerial operations needed with regard to data, software, data flow programs, and personnel when using computers in a business environment. At the course, managers will become

familiar with data processing terminology and special considerations necessary in managing data. Hands-on experience on IBM Personal Computers will introduce students to the utilization of spread sheets, word processing functions, and data file manipulation.

Current students may register for this course between April 30 and May 24. Those not currently enrolled may register on June 4. Fee for the course is \$32 per credit hour.

For more information on the course, persons may contact the office of the dean of the school of business administration by phoning 624-8100, extension 319.

Anorexia nervosa seminar to be held here Tuesday

Through a grant provided by the Missouri Southern Faculty Development Committee, a seminar on anorexia nervosa will be presented at 7 p.m. Tuesday in Room 217 of the Education Psychology Building.

Barry Fiedler and Dr. David

will be the guest speakers. Fiedler is a licensed psychologist who was formerly employed at the Community Mental Health Center. He has been in private practice since 1982. He is expected to speak on psychological aspects of anorexia.

Jobe has a Ph.D. in neuroanatomy, and a master's degree in psychiatry from Creighton University. Jobe is a native of Neosho and attended Joplin Junior College. He has been in psychiatry practice since 1979. His topic concerns the medical aspects of Anorexia.

After the seminar, any interested students may want to meet with Debra Peters, a Missouri Southern student, in regard to forming a campus anorexia discussion group which would meet periodically in the future.

Joplin groups to sponsor contest

The Joplin Chamber of Commerce and Joplin Area Ad Club are sponsoring a poster contest.

The contest is open to anyone who works in Jasper or Newton counties. Eligibility is not restricted to professional artists, "although professional artistic standards will be used in the judging," the rules state.

Entries to be considered in the judging include: originality of design, effective use of medium, effective adaptation of Joplin's historical theme, innovation of the year 1984 as a part of the artwork, technical merit, artistic interpretation, incorporation of a

"positive feeling" about Joplin, and appropriate feel for the community. Three prizes will be given, \$500 for first place, \$250 for second place, and \$150 for third place.

To participate in the contest those interested must file an entry form and a \$15 fee for each entry at the Joplin Chamber of Commerce by June 1. Finished poster artwork is due at the Chamber office by July 9.

More information and an official entry form may be obtained from the Joplin Chamber of Commerce, 112 W. 4th, Joplin; phone 624-4150.

THE LEARNING CHANNEL REACHES THE COMMUNITY

The only cable program network that makes lifelong learning its fulltime business!

YOU MEAN THERE'S MORE TO CABLE TV THAN JUST MOVIES?

You bet there is!
A world full of knowledge is yours for the asking—on The Learning Channel, Cable TV's adult learning network. Pick up money tips, brush up on a hobby, enroll in a telecourse, and find out what makes your kids tick. Learn all this, and a lot more all day long, 7 days a week on TLC. Contact your cable operator for details. And enjoy more of what TV was created for.

TELEVISION FOR THE MIND'S EYE

The Learning Channel is now in Joplin, Webb City, and Carterville on Cable Channel 18. It's the first step in bringing you an educational access channel from MSTV—Missouri Southern Television.

Broadcasting from 5 a.m. until 3 p.m. each day, The Learning Channel offers you a variety of educational programming, including telecourses. Telecourses are now in their final weeks of the semester. Tune in, watch a few, and then this summer, watch several. Later this year some may be available for college credit through Missouri Southern.

MSTV is a new concept in educational television programming. Join in on the ground floor now by watching The Learning Channel. Then, in September, see the birth of MSTV in its fullness. We will be offering original programming in addition to network programming. We'll be reaching out to you.

MSTV is an outreach effort, designed to broaden the campus of Missouri Southern and to assist residents of the area to profit more directly from the institution they helped create.

Lady Lions defeat Jewell, 4-1

Missouri Southern edged William Jewell College 4-1 yesterday afternoon in a make-up softball contest in Liberty, Mo.

"We played well, but we just made too many errors," said Renee Easter, William Jewell center-fielder. "That's what blew it for us."

The Lady Lions, coached by Pat Lipira, leave this morning for Wayne, Neb., where the Central States Intercollegiate Conference tournament will be held. The tournament will run tomorrow through Saturday.

Southern will then compete in the NAIA District 16 playoffs, which begin Wednesday, May 2. The playoffs will end Saturday, May 5.

Southwest Baptist University swept two games Tuesday from the Lady Lions in Bolivar. The scores were 3-0 and 5-0.

Bohrt photo

Sophomore Sheri Dalton prepares to bunt in a recent game.

Lions drop two games at OSU

After winning eight straight games, Missouri Southern dropped its first two games at nationally-ranked State University Tuesday in Stillwater.

OSU, ranked eighth in the nation, prevailed 11-4 and 6-1.

The Lions will take on Wayne State in the Nebraska division championship game of this weekend's Central States Intercollegiate Conference tournament. Missouri Southern has a perfect record in CSIC games, and according to Warren Turner, "This is what we want for all season. We want to peak at the right time."

Friday and Saturday's games will be at 1:30 p.m. at Joe Becker Stadium. The Lions only have one more game, and that is at Southwest Missouri State University in Springfield at 4 p.m. Monday.

Lipira distinguishes between athletics and physical education

By Lynn Iliff

"Athletics and physical education are two totally different things," said Pat Lipira, instructor of physical education and coach of volleyball and softball at Missouri Southern.

"There is so much more to physical education than what the general population thinks," Lipira said. "It's important that they know what it is, but what is more critical is that the (physical education) majors know."

"You're dealing with everybody in physical education, not just athletes," added Lipira. "Your goal as a teacher is to attempt to find something they'll enjoy doing for a lifetime. You introduce a wide variety of activities so they can choose one they'll continue doing throughout their lives."

"In athletics, you're dealing with extremely skilled people," she continued. "They're an elite group and your goal as a coach is to get them to excel as best they can, utilizing those skills."

Presently, Lipira is teaching the Fundamentals of Physical Education Activities class with some 30 majors enrolled. She has initiated a unit to increase the awareness of what physical education is and the significance it has in everyone's life.

"Fitness for Life" is the most important unit," Lipira said. "We're getting

away from the traditional physical education and getting into the idea of lifetime fitness. It's a whole new concept. Fitness is important for life—not for just an hour."

The whole idea of the program is that it is oriented toward the importance of being physically active, she said. Also, it is non-competitive.

"Competition is important and it can still be a part of the curriculum, but it shouldn't be skill-oriented. You don't have to be an athlete to be healthy."

Lipira came to Southern in the fall of 1981 immediately after obtaining her master's degree at Kansas State University. She graduated from Northwest Missouri State University in 1978 with a bachelor of science in education degree in physical education and mathematics.

Both teams under Lipira's leadership have had winning seasons each year. The volleyball team has "built itself up for national recognition, and this past year was our winningest season ever."

The softball team has had a winning record, but it may not look as impressive as it really is. "We play a lot of tough schools, some NCAA, and despite that we come up with a winning record."

During her time as a student teacher in undergraduate studies, Lipira realized that physical education at the

high school level was not what was wanted or expected it to be.

"I don't like the physical education curriculum at the high school level," she said. "They're missing the ball. The kids have been taught to play and not to listen. I want to change that. That's what I'm there for."

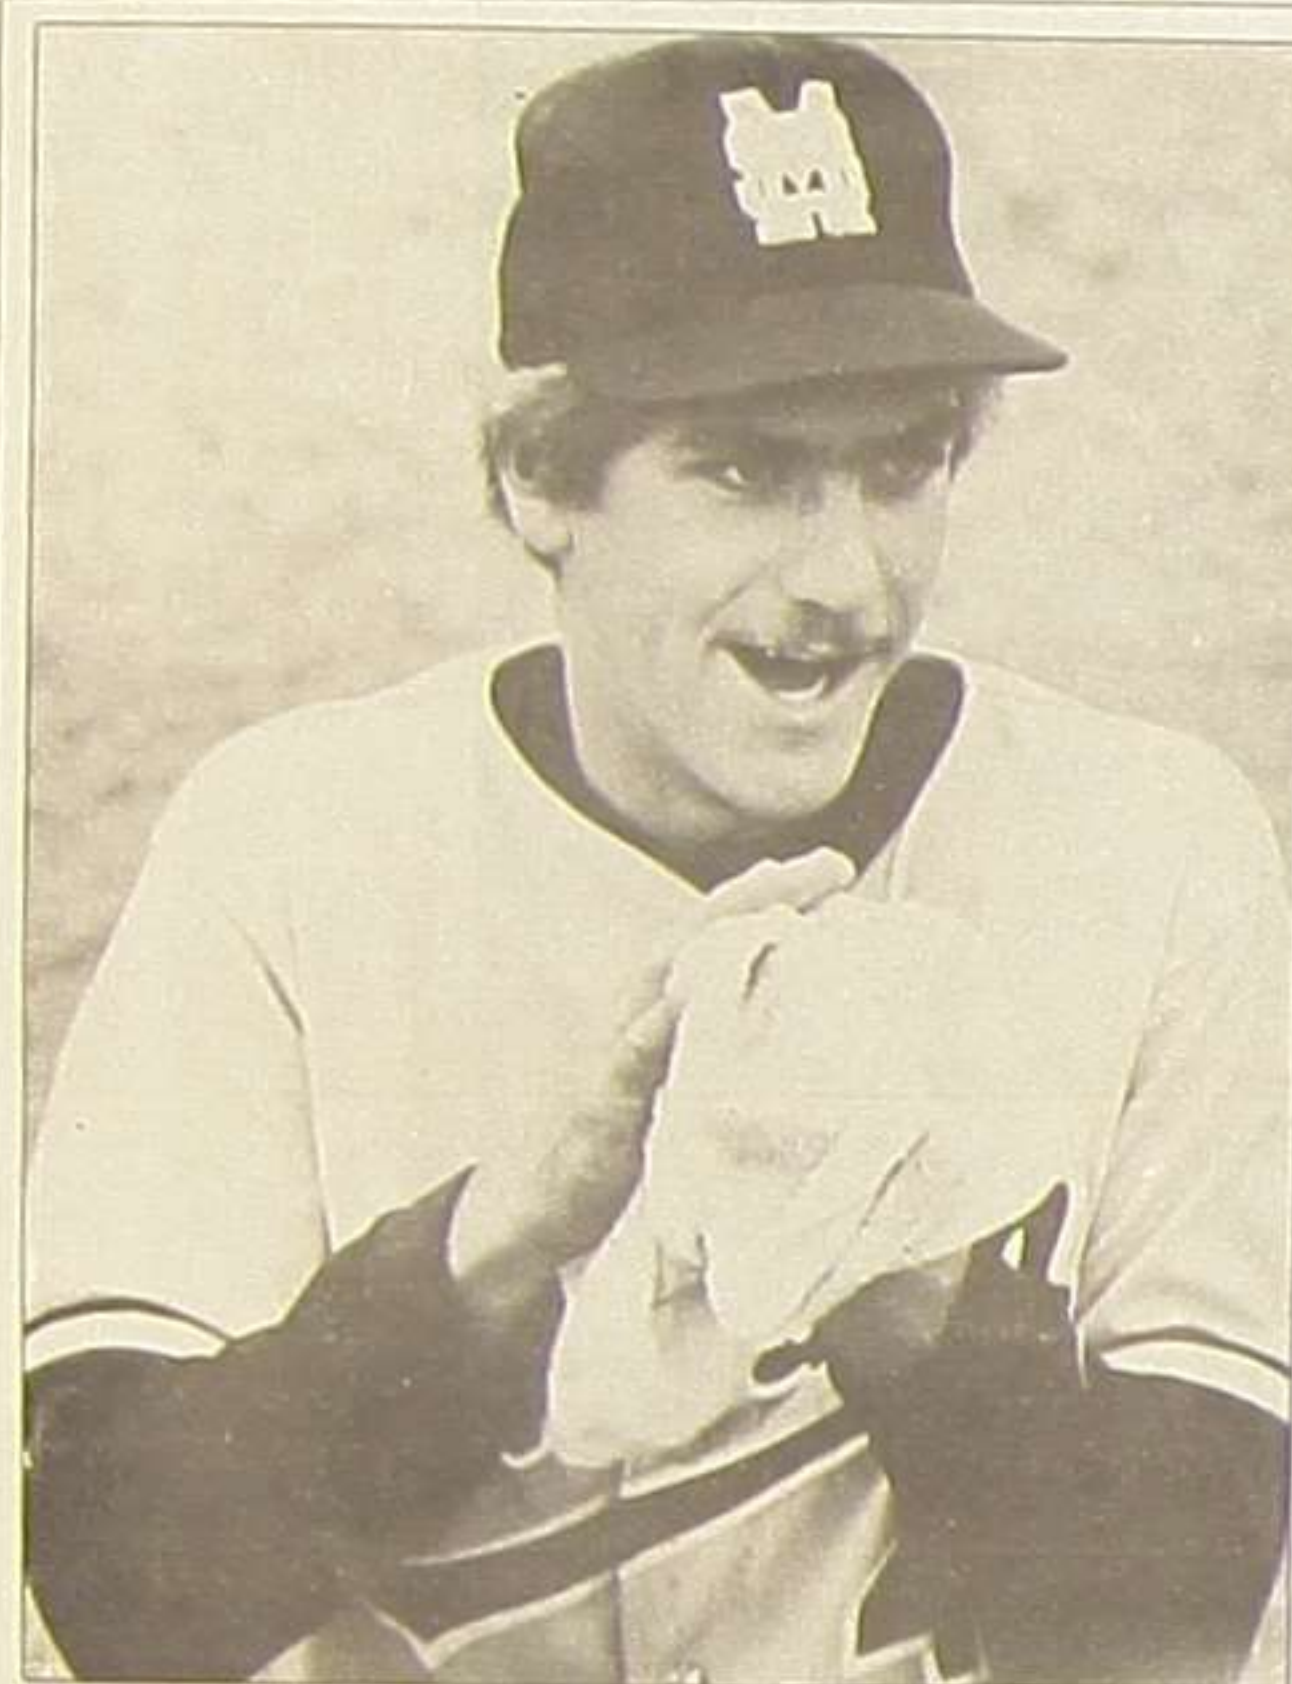

"I'm a big advocate for physical education," said Lipira. "I'd like to revamp the school system curriculum. It's extremely important for life."

Lipira believes that "everybody needs to know WHY physical education is important."

"Most physical education teachers have never been able to answer the question," she said. "They never could tell them why they're doing it."

"It's important for your kids to be physically fit for life," she said. "In my opinion, that's it. Every child that walks out of here—I want them to have that concept and to be able to defend their curriculum if it is questioned."

"Success as a physical education instructor is not how high the kids score on their tests, it's when 10 years later they are still active," said Lipira. "That is when they've done their job."

Baker photo

He realizes importance of acquiring an education

By Scott Wilckens

Much like every other amateur baseball player, Chris Hussion, a freshman outfielder for Missouri Southern, would like to play professional baseball. But he also realizes the importance of acquiring an education.

"I'm not giving up the hope for playing pro," Hussion said. "But, you can't play baseball all your life. You need an education."

The Winchester, Va., native has only lived in Joplin since August. He is thinking about studying pre-veterinarian medicine.

"Virginia Tech and West Virginia looked at me my senior year," Hussion said. "But when my father got a job at St. John's Hospital in Joplin, I decided on Southern."

Hussion said that sports have been a major influence in his life.

"I've been playing ball for 12 years," Hussion said, "ever since I could hit the T-ball."

Hussion said he admires the playing style of baseball star Pete Rose.

"If I could be like anyone," Hussion said, "it would be Pete because

he always hustles and does his best."

Since he is a freshman, Hussion has seen limited action on the field.

He described his performance this season by saying, "You could just say I'm improving. I've learned a lot from Coach (Warren) Turner."

"I'm not a power hitter, so I need to start lifting weights," said Hussion. "That would improve my power and my throwing arm."

Other than baseball, Hussion collects beer cans as a hobby.

"I enjoy collecting the cans," he said. "Probably my old German cone-top can is my favorite."

Hussion said that among his other 500 cans is a Frothing-slosh can, which he described as unique.

As a freshman, Hussion figures on being involved in Southern's baseball program for the future.

"We should be strong down the road," he said. "We're only losing a few hitters, and with lots of work next fall our young pitchers will fill the hole left when we lose a couple of our starters."

"If the coach finds us some heaters, we'll be tough," he added.

Four recruits sign with Southern

Chuck Williams, men's basketball coach at Missouri Southern, has lined up four recruits for the 1984-85 season.

Rick Braiser, a Willow Springs High School product, was a First Team All-State and All-District honoree his senior year. Playing as forward for the Bears, Braiser shot 67 per cent from the field and 71 per cent from the free throw line. He was awarded "Player of the Year" for the South Central Association.

Williams said, "I feel that Rick is a fine young prospect. As he matures and gets stronger, I think he will be a top college basketball player."

James Ward, a transfer from Pan American University, has been practicing

with the Lions since Christmas break, but has maintained his redshirt status. As a senior at Van Horn High School in Independence, he averaged 19 points a game.

Ward's "Outstanding physical tools" will benefit the Lions, according to Williams. He said, "Ward is quick and strong, and will be an excellent player in District 16 and the CSIC."

Jeff Starkweather, a 1982 Parkwood graduate, played at Midwestern University his freshman year. He sat out as a redshirt in the 1983-84 season, but will be participating this coming year.

As the starting point guard for the Bears, Starkweather led the team to a

ninth place finish in the final basketball poll and a second place finish in the district playoffs. He was named to the All-District 2nd Team.

Williams feels that he has improved since last playing for Parkwood. "In high school, Jeff showed ability to lead a ballclub. I think him to be a fine addition to the team," Williams said.

Darrin Jackson of Soldan School in St. Louis will be a guard position for the Lions this season. Under Jackson's leadership, Soldan finished second in the state behind 4A State Runner-up York.
